

Introducing the new *Freight Wing Gap Fairing* 2012.

Another proven winner made better.

This New Flexible Plastic Design Redefines the Potential of a Front Trailer Fairing

Now with flexible plastic panels and braces, you do not need to worry about impact damage negating your important fuel economy benefits. This new improved design and lower price will make the Freight Wing Gap Fairing an important addition to any high mileage dry van trailer.

This fairing will save 1-2% for the most efficient aerodynamic and gap specifications used by today's long haul tractors. These savings can double if your trucks lack optimized aerodynamics and/or run a large gap setting.

Lightweight at only 50 lbs. and with an easy install of under 2 man hours, this simple addition to your trailer will provide excellent long term savings!

A Perfect Match Together - 9% Fuel Savings

- The Gap Fairing is the perfect match with the AeroFlex skirting for the ultimate in aerodynamic fuel savings!
- Boost your savings up to 9% when using our front and side fairings together!
- EPA SmartWay Verified in the trailer gap reducer category.

PIONEERS AND INNOVATORS. WE ARE FREIGHT WING.
